

Digitalise retailer experience

Retailers

Retailer module is used to track the sales of the tickets that are distributed to retailers (for example, supermarket chains).

- Create retailers
- Upload or generate batches of barcodes per campaign
- Track your campaign performance and barcode usage
- Invalidate non used codes after your campaign ends
- Less manual work, direct real time insight

Features | Retailers

The screenshot shows a mobile app interface for generating a barcode batch. The form has a title 'Generate barcode batch' and a close button. It contains several input fields: 'Name' with the value 'Adult tickets - February 2022', 'Products' with a dropdown showing '1 product', 'Valid from' with the date '01/02/2022', 'Valid to' with the date '28/02/2022', 'Batch size' with the value '1000', 'Prefix (optional)' with the placeholder 'Code prefix', and 'Note (optional)' with the placeholder 'Code note'. At the bottom, there are 'Cancel' and 'Save' buttons.

Generate or upload barcode batch

Scannable codes ☒

Download and remove unused codes

▶ **How can I create the codes?**

→ You can either generate random codes via Convious or upload your own codes

▶ **Can I see if specific code has been used?**

→ Yes, you can do that by searching for a code in the Orders page
